You do not need technical expertise. You don't need to know which AI to use. Your task is to show us your business.

Step 1. Growth Request (goals, problems).

Step 2. Getting to know the company (operations, structure).

Step 3. Access to information (only what's needed, under NDA).

Step 4. Openness to improvement.

Instead of fighting routine and daily operations, you get a system that works efficiently, requires less manual intervention.
